

# Pre-Event Health Screening

Dear Girl Scout Participants & Caregivers,

The best event sessions start with healthy participants, volunteers and staff and this begins at home. In an effort to minimize illness at events, we ask that each participant complete a health screening daily beginning 14 days prior to the event. Please bring the completed form to check-in on the first day or complete electronically in CampDoc\*. We will use the information to understand the overall camp environment and help us keep participants safe; answers reflected are not intended to disqualify a participant from attending.

Participant Name: \_\_\_\_\_

Event Name: \_\_\_\_\_ Event Date(s): \_\_\_\_\_

In the chart below, record an "X" for any day your participant has experienced a temperature above 100 degrees F. In the symptoms row, please indicate any common COVID-19 symptoms present only for the days where a temperature was above 100 degrees F. **If your participant has experienced no temperature above 100 degrees F, no action is necessary.**

Common COVID-19 symptoms are:

- Cough
- Fever
- Chills
- Muscle pain
- Sore throat
- New loss of taste or smell
- Nausea
- Vomiting
- Diarrhea
- Shortness of breath or difficulty breathing
